

Ariel Mirra

SENIOR SOFTWARE ENGINEER

arielmirra.com@gmail.com | linkedin.com/in/arielmirra | github.com/arielmirra | arielmirra.github.io/portfolio |

Buenos Aires, Argentina

PROFESSIONAL SUMMARY

Senior Software Engineer with ~8 years in tech, the last ~6 at Salesforce/MuleSoft, working at the intersection of API-modeling infrastructure and AI-native developer tooling. Own an API-modeling framework (AMF) consumed by **10+ downstream products**, and built a suite of agentic AI (Claude Code) automation skills adopted by the team: multi-repo releases from **5 days to 2-3 days**, API-spec adoption **~10x faster**, Gov/FedRAMP security review from **3-4 hours to 30 minutes**, and **4+ hours saved per incident** on RCAs. Primary stack: Scala, Java, Kotlin, Go, TypeScript, Spring.

CORE COMPETENCIES

AI-Native Development

API Modeling & OpenAPI/AsyncAPI

Scala & Functional Programming

Go & Distributed Systems

Kubernetes & Terraform / AWS

Developer Tooling & CLIs

Agentic AI / Claude Code Automation

Cross-Team Technical Ownership

WORK EXPERIENCE

- Salesforce (MuleSoft)

Jan 2025 - Present

Senior Software Engineer (SMTS)

Remote from Buenos Aires

- Built a suite of agentic AI (Claude Code) automation skills adopted by the team, recognized as the team's most active Claude Code investigator: cut the multi-repo release pipeline from **5 days to 2-3 days**, sped up API-spec adoption **~10x** (a day-plus down to minutes), reduced Gov/FedRAMP security review from **3-4 hours to 30 minutes**, and saved **4+ hours per incident** on RCAs.
 - Led the AMF foundation of a platform-wide OpenAPI 3.1/3.2 initiative: AMF 5.11.0 adopted multiple new specs in a single month (OAS 3.2, AsyncAPI 3.0/3.1, JSON Schema 2020-12, GraphQL V2, gRPC/proto3, and more), additively and without breaking dozens of downstream products.
 - Re-architected the GraphQL parser/validator from a REST-derived model into a native, spec-faithful engine matching the 2021 GraphQL specification, shipped across **4 downstream consumers** with zero production breakage.
 - Owned and automated a 7-repo coordinated release pipeline for an open-source framework via human-in-the-loop automation, cutting release time from **5 days to 2-3 days**.
 - Owned resolution and root-cause analysis of a ~26-hour customer-visible GovCloud incident (a FIPS/certificate regression in a FedRAMP service), delivering two RCAs within SLA.
 - As SMTS, leads system design and architecture decisions for the team, partners cross-team end-to-end on customer-facing solutions, and mentors other engineers.
- Universidad Austral, Buenos Aires

Jan 2023 - Present

Professor of Entrepreneurship and Innovation

On-site, Buenos Aires (seasonal)

-
- Salesforce (MuleSoft)

Aug 2022 - Feb 2025

Software Engineer (MTS)

Remote from Buenos Aires

- Consolidated a multi-repo Scala framework into a single monorepo, solo, with drift-safe artifact publishing to Nexus and no consumer-visible change.
 - Extended OCLIF CLIs and the public npm package `anypoint-project-builder` to support OAS 3.1/3.2 generate/validate end-to-end.

- Cross-team technical owner of an API-modeling framework (AMF) consumed by **10+ products**: governance rulesets, bug fixes, and onboarding/mentoring a new engineer.

Salesforce (MuleSoft)

Software Engineer (AMTS)

Buenos Aires, Argentina

Apr 2021 - Aug 2022

Salesforce (MuleSoft)

Software Engineering Intern

Buenos Aires, Argentina

Oct 2019 - Apr 2021

Sirius Systems S.A.S.

Software Developer / Frontend Developer

Buenos Aires

Feb 2018 - Mar 2019

- Designed websites and web applications using frameworks including Next.js, Angular, Vue.js, and React.

PROJECTS

AMF (API Modeling Framework) Open Source

Cross-team technical ownership of a framework consumed by **10+ products**: led the AMF foundation behind release 5.11.0, which added OAS 3.2, AsyncAPI 3.0/3.1, JSON Schema 2020-12, GraphQL V2 and gRPC/proto3 support in one month, plus a ~45-page Docusaurus documentation site at a.ml/docs.

Scala, OpenAPI, AsyncAPI, JSON Schema, GraphQL, gRPC

anypoint-project-builder Public npm Package

Public npm package / OCLIF CLI extension for end-to-end OpenAPI 3.1/3.2 generate/validate workflows.

OCLIF, TypeScript, OpenAPI

Agentic AI (Claude Code) Automation Skills Internal Tooling

A suite of internal tooling built on Claude Code / agentic AI workflows, adopted team-wide: multi-repo release automation, API-spec adoption tooling, Gov/FedRAMP security review automation, and incident RCA acceleration.

Claude Code, LLM-assisted workflows, prompt engineering

EDUCATION

B.Sc. Software Engineering **Universidad Austral, Buenos Aires, Argentina**

Graduated with honors.

Feb 2016 - Jun 2021

SKILLS

Primary: Scala, Java, Kotlin, Go, TypeScript, Spring

Secondary: Next.js, React.js, Node.js, Play, Akka, GraphQL, Kubernetes, Terraform, AWS, ANTLR, OCLIF, OpenAPI (OAS), AsyncAPI, JSON Schema, Angular, Vue.js

AI & LLM: Claude Code / agentic AI tooling, LLM-assisted workflows, prompt engineering, RAG, vector search & embeddings, MCP (Model Context Protocol), agent-to-agent integration

Languages (Spoken): Spanish (native), English (C1)
